Body Text

This is the main space where all users, both visitors and registered users, can find and connect with chefs. The goal is to make accessing chefs straightforward and frictionless, eliminating barriers present in the mobile app. We aim to ensure that users can take any action without limitations, minimizing drop-off rates and clarifying why the app may be inaccessible. Users can search by chef name, cuisine, and filter by availability and proximity.

The chef's profile became the center of everything. It had to feel clear and welcoming for customers, while giving chefs the space to show their story and work with confidence.

In the end, it was about connection. Photos, reviews, and bios came together to help customers trust the chef and take the next step.

The app gives users choice—order a meal, hire a chef, or request a quote. Built-in chat keeps every request and detail in one place, so nothing gets lost.
